DETAILED ACTION

1. Upon further consideration, the final rejection of July 11, 2005 is withdrawn. The amendment filed October 11, 2005 has been entered. The indicated allowability of claim 4 has been withdrawn, and the following is the action on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 00/36046 (Dournel et al.) Dournel et al. disclose a refrigerant consisting essentially of 1,1,1,3,3-pentafluorobutane (page 6 line 2). Dournel et al. expressly disclose the application of said refrigerant in cooling systems comprising a turbocompressor that compresses a refrigerant (page 11, lines 18-24). It is understood that such turbocompressor cooling systems inherently operate by compressing the refrigerant and allowing the refrigerant to expand in heat exchange relation with the material to be cooled, as is well known in the art.

Allowable Subject Matter

4. Claims 2, 3, and 5 are allowed.

Response to Arguments

5. Applicant's arguments filed October 11, 2005 have been fully considered but they are not persuasive. Applicant argues the prior art refrigerant having 1,1,1,3,3-pentafluorobutane in combination with a fluoro compound; however, it is noted that the prior art also shows a refrigerant of 99% 1,1,1,3,3-pentafluorobutane with 1% methanol.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5076064 (Kopko): discloses a method for replacing refrigerants in a centrifugal compressor.
